

Steps to Enroll a New Blacklisted Person

Go to <http://localhost:18081>

The screenshot shows a web browser window with the address bar set to `localhost:18081/docs`. The browser's bookmark bar contains several entries, including 'Health care', 'Used Car Purc...', 'New Tech Ideas', 'Aggregated B...', 'AI in Steel Ind...', 'AirBnB', 'ASI', 'B2C', 'Bus Stations', 'Buses', 'Census Handh...', and 'Census Count...'. The main content area displays the Swagger UI for the 'CensusCounters-REST' API. The API version is '0.9.0.0' and the OpenAPI specification version is '3.1'. A link to the 'openapi.json' file is provided. The description states it is a 'FastAPI wrapper for CensusCounters Face API.' The API is organized into three sections: 'Detection & recognition', 'default', and 'Utility'. Each section contains a list of endpoints with their HTTP methods and descriptions. The 'Detection & recognition' section has three endpoints: 'POST /extract' (Extract), 'POST /draw_detections' (Draw), and 'POST /multipart/draw_detections' (Draw Up). The 'default' section has five endpoints: 'POST /delete' (Delete), 'POST /clean_database' (Clean Database), 'POST /list_all_faces' (List All Faces), 'POST /enroll' (Enroll), and 'POST /recognize' (Recognize). The 'Utility' section has two endpoints: 'POST /flush' (Flush Collection) and 'GET /info' (Info).
